Does it increase number of parking spaces from current condition? If so by how many spaces?

Does it restrict or eliminate turning movements for existing driveways and intersections?

Does it prevent truck deliveries that use the center of the street currently?

Does it remove existing or limit future bike lanes?

How do vehicle occupants get to the sidewalk? Jaywalking, or is access to a crosswalk provided?

Assuming a raised curb median is used how will drainage be impacted and addressed?

Assuming a raised curb median is used how will snow removal activities be impacted and addressed?

What will annual O&M costs be and how will they be funded?

Does the median parking fit in the existing "curb to curb" dimensions or will major sidewalk, park strip and possibly utility relocation be needed?
