Title: A discussion regarding the disposal of yard waste in the City of Moab.

Presenter: Joel Linares

Attachment(s):
- Burn Materials

Suggested Motion: No motion is suggested as this is agenda item is a discussion item.

Background/Summary:

When this came up before, the Council decided that it was preferable to have a system to haul or manage yard waste for residents in lieu of burning. The City can investigate two ways for us to manage yard waste in lieu of burning. The first strategy is to develop a system where Public Works offers a seasonal service to ‘chip’ yard waste for residents at a fee. This is a ‘no hauling and no burning’ option for people that want to mulch. The second strategy is to continue the conversation of a fee-based yard waste pickup service with Monument Waste.
