Moab City Council Agenda Item
Meeting Date: April 13, 2021

Title: Sewer rate change for Institutions.

Presenter: Joel Linares

Attachment(s):
- Ordinance 2021-08

**Suggested Motion:** I move to adopt Ordinance #2021-08, “An ordinance amending the municipal sewer rate classification to modify institutions including churches and government facilities to be calculated using the winter water rate use calculation”

**Background/Summary:**

In the spring of 2019 religious institutions approached the City of Moab in an attempt to have their sewer rates reconsidered. These institutions were having their sewer rate calculated based on a commercial user rate. Commercial user sewer rates are calculated based on water usage on a month-to-month basis. Residential user sewer rates are calculated based on winter water usage. The religious institutions wished to use the residential calculation formally as they felt they were being billed for sewer for water that was being used for landscaping purposes and was not entering into the sewer system.
