To Whom It May Concern,

I am writing to express my support for installing National Electric Vehicle Infrastructure (NEVI) compliant DC Fast Chargers at the Maverik gas station located at 435 North Main St. in Moab Utah. I firmly believe that this initiative will have a positive impact on our community.

The installation of DC Fast Chargers at Maverik gas station aligns with Moab City's commitment to sustainable development. By providing DC Fast Chargers at such a convenient location, we are not only supporting the growing population of EV owners in our community but also encouraging others to adopt electric vehicles.

Moab is a gateway community to two national parks and is renowned around the world for its recreational opportunities. DC Fast Chargers will also be an important addition to support those visitors who utilize EV to travel throughout the area.

We believe that installing these charging stations will contribute to the economic sustainable growth in our community.

Thank you for your consideration and please let us know if you have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Joette La", with a long horizontal flourish extending to the right.
